

Nick Reese

About Me

Nick Reese most recently served as the first ever Director of Emerging Technology Policy at the US Department of Homeland Security where he advised the White House and senior Cabinet officials on national security implications of emerging technologies. He is the author of the DHS AI Strategy, DHS's Post-Quantum Cryptographic Transition Roadmap, and the 2022 DHS Space Policy. He was also the lead DHS representative for the development of Space Policy Directive-5, National Security Memorandum-10, the National Space Policy, and Executive Order 13960.

A noted expert in cyber operations, quantum computing, artificial intelligence, and outer space, he currently holds a faculty position at New York University teaching graduate courses related to emerging technology and geopolitics. Mr. Reese has a 20+ year career in the US Military, Intelligence Community & Homeland security with a focus on operations and bringing technical solutions to high stakes national security challenges. From the front lines of the War on Terror to building Quantum Computing Policy he has been an instrumental actor in protecting our nation with eye both on today and the future.

Mr. Reese is a graduate of Saint Leo University and Old Dominion University. He lives in the Washington DC area with his wife and their dog.
